

# Towards a Community Roadmap

---

MDENet France Workshop 2023  
Sophie Ebersold, Eric Cariou, Benoît Combemale, Steffen Zschaler

<https://international.mde-network.org/paris23>

# Main Objective of the Session

- Identify the new challenges for the MDE community
- Elaborate a community roadmap
- Support the discussion for future collaborations

# Organization of the Session (1hr)

- **Part 1: challenge elicitation (in broad)**
  - Format: post-it brainstorming session (10min + 10min debrief)
    - write up to 3 post-it notes each with one key challenge and stick them onto the wall
    - the group review the wall and cluster notes together based on theme
  
- **Part 2: challenge description (in depth)**
  - Format: worldcafé (15min + 5\*2min debrief)
    - each group select one topic
    - provides as outcome one slide describing the topic and related challenges

# The post-it session: Key challenges of MDE

A word cloud of terms related to Model-Driven Engineering (MDE). The words are arranged in a tilted, overlapping manner. The most prominent words are 'usability' and 'coevolution'. Other visible terms include 'formalisation', 'marketing', 'federation', 'AI', 'sustainability', 'Digitaltwins', 'Requirements', 'crosscutting', 'Tests', 'Tools', 'MBSE', 'multilevel', and 'Collaboration'.

Requirements crosscutting federation formalisation MBSE Tests Tools marketing MBSE usability AI Collaboration coevolution multilevel Digitaltwins sustainability

# The post-it notes
